Notes:

- A "significant instrument/product" is defined as a single instrument/product of group of similar instruments/products which in aggregate amount to more than 1% of total liabilities.
- Total Liabilities has been computed as sum of all liabilities (Balance Sheet figure) less Equities and Reserves/Surplus.
- Borrowings value considered in above calculation are based on face value.
- Public funds are considered as total of borrowings from NCD, CP, Bank Loans and ICDs.
- Other short term liabilities include all contractual obligation payable within a period of 1 year excluding commercial paper.

Institutional set-up for liquidity risk management

The Board of Directors (the Board) is responsible for the overall management of Liquidity Risk. The Board has defined liquidity risk management strategy and sets the overall policy and risk tolerances.

In order to manage/mitigate liquidity risk, in addition to regulatory limits on liquidity gaps, the Company has also defined prudential internal limit for Liquidity Gap tolerance for its time bucket (upto 1 year) which is approved by the Board.

Treasury is responsible for managing liquidity under the liquidity risk management framework as approved by the Board. ALCO is responsible for ensuring adherence to the risk tolerance/limits set by the Board.

Liquidity risk management strategies and practices are reviewed to align with changes to the external environment, including regulatory changes, business conditions and market developments. Actual and anticipated cash flows generated are monitored to ensure compliance with limits.
